

## Comparison Matrix for Office Survival Kits

### Office Survival Kits:

The GetReadyGear *Office Survival Kits* have been designed to accommodate most businesses. From small to large, we provide the necessary survival supplies for your critical workforce. All of our office kit configurations are Premium kits providing needed food, water, sanitation, lighting, communications and first aid supplies for up to 3 days. Our 1 person fanny pack has been designed to be located at each employee's desk for their personal use. Our 5, 10, 20 and 100 person *Office Survival Kits* are designed to be mixed and matched to support any number of employees. In addition to the number of employees, a key decision in the determination of which kits to procure depends on the location of employees within a building. Often times it is best to have these larger kits located strategically throughout a structure to support smaller groups of employees. This may be advantageous when an earthquake damages a portion of a building and not the entire building. Alternatively, it may make more sense to centrally locate the supplies in a safe area that will always be accessible to employees should they need the supplies.
